Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 10, 12-13 and 15-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Petho et al. (US 4,987,726).

Petho et al. disclose a method and device for filling and sealing containers in a clean environment with clean room 3. Containers are closed in a closing or stoppering station; see figure 7. Petho et al. disclose "The system, which is sealed from the exterior, is provided with known sealing lock arrangements for the sterile introduction of empty bottles," etc. (see abstract, last sentence). Prior to entering the clean room 3 the containers are cleaned in cleaning lock 17 before entering tunnel 14; see figures 1 and 2. Second cleaning lock is provided (inside clean room) for sterile stoppers; see column 4, lines 27-33 and column 7, lines 47-60. The sterilization method disclosed uses an inert gasification device (nitrogen).

Regarding claims 15-16, and 19, Petho et al. disclose "Both the supply tunnel and the discharge or outfeed means are provided with a known sealing lock arrangement (not shown) for maintaining sterility and a suitable pressure... in the tunnel 14." (column 4, lines 6-9). Therefore, the filled and sealed bottles when returned to tunnel 14 are further cleansed (exterior) with a positive pressure before final discharge.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Petho et al. (US 4,987,726) in view of Frisk (US 5,928,607).

Petho et al. discloses the use of an inert gas (preferably nitrogen), not the use of ozone, however Frisk teaches the use of ozone for sterilizing a container prior to filling with a perishable product; see entire reference. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use ozone as taught by Frisk in the invention to Petho et al. in order to sterilize the containers. Petho et al. generally disclose the use of an inert gas.

Response to Arguments

5. Applicant's arguments filed 10/6/03 have been fully considered but they are not persuasive. The invention to Petho et al. anticipates a "clean room". Petho et al. disclose multiple sterilization procedures including sealing locks in order to process/fill the containers without contamination.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
